Specifications

| General Specifications | Detail                                                                                                                                                               |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Bend                   | 100N                                                                                                                                                                 |
| Capacity (GB)          | 32                                                                                                                                                                   |
| Dust Proof             | IP6X (IEC)                                                                                                                                                           |
| Interface              | UHS-I SD Interface                                                                                                                                                   |
| Operating Current      | 800mA (MAX)                                                                                                                                                          |
| Operating Temperature  | -25-+85° C (Non-condensing)                                                                                                                                          |
| Power Requirements     | 2.7V-3.6V                                                                                                                                                            |
| Shock                  | 2,500G                                                                                                                                                               |
| Speed Class            | Class10 (SD Speed Class) Class 3 (UHS Speed Class)                                                                                                                   |
| Transfer Speed         | Read: Up to 95MB/s Write: Up to 90MB/s (Based upon Sony testing using SD Association certified testing tool. Transfer speeds vary and are dependent on host device.) |
| Twist (Torque)         | 1N-m                                                                                                                                                                 |
| Warranty               | 5 years                                                                                                                                                              |
| Waterproof             | 72 hours @1.2m (Higher than IPX7)                                                                                                                                    |
